HYBRID Software Releases iC3D Suite 9.5 for Precision and Flexibility in Packaging Innovation

(Ghent, Belgium) HYBRID Software is pleased to announce the release of iC3D Suite version 9.5, which introduces new features and user experience updates for the innovative packaging design and visualization software. The significant enhancements streamline the workflow for packaging professionals and graphic designers.

The new version introduces expanded support for additional 3D file formats, including GLTF, GLB, and FBX. These formats are widely used in the industry and offer efficient data transmission, compatibility, and precision in 3D scene data. This enhancement will allow users to import and export these formats, providing greater flexibility and efficiency in their 3D design processes.

iC3D 9.5 also brings major improvements to the internal PDF Editor. Users can now select Page Boxes of the PDF files being used, and improvements have been made to PDF layer visibility. These features leverage front-line technology from HYBRID Software's own PACKZ PDF Libraries, delivering an elevated user experience and increasing productivity.

States Product Manager Heath Luetkens, "The PDF Editor is now available for the Select and Designer editions of iC3D in addition to our full-featured iC3D Suite. This expansion of features to more versions of the software ensures that a wider range of users can benefit from the enhanced capabilities of the PDF Editor."

iC3D 9.5 continues to deliver on Hybrid Software's commitment to providing fast, accurate, and photorealistic 3D virtual prototypes or press-ready proofs for the packaging design industry.

Visitors of drupa 2024 will be able to experience iC3D at the new [Touchpoint Packaging](#) arena in Hall 3 Stand B31 and at Hybrid Software's booth in Hall 7A Stand D03.

END

About HYBRID Software

With offices in Belgium, Germany, US, UK, Spain, France, Italy, and China plus a global partner network, HYBRID Software is an enterprise software development company that focuses on innovative productivity tools for the graphic arts industry.

HYBRID Software's CLOUDFLOW workflow, PACKZ and STEPZ editors, and print quality solutions offer a unique set of advantages, including native PDF workflows, enterprise cloud solutions, scalable technology with low cost of ownership, and direct integration with leading MIS solutions and output devices. These products are used by thousands of customers worldwide in all areas of prepress and print, including labels and packaging, folding cartons, corrugated, wide format, and digital printing. HYBRID Software is a subsidiary of Hybrid Software Group.
